CAREER OBJECTIVE

Motivated BSc (Hons) Computing student with practical experience in full-stack web development using the MERN stack and a growing interest in IoT systems. Skilled in designing responsive, user-centric web applications with a strong foundation in UI/UX design. Seeking an opportunity to apply technical expertise and creative problem-solving skills within a dynamic, growth-oriented organisation.

EDUCATION

BSc (Hons) Computing

2024 – Present

Itahari International College Pvt. Ltd. | London Metropolitan University, UK
Sundarharaicha-04, Dulari, Morang, Nepal

- Core modules: Web Technologies, Software Engineering, Database Systems, and Human-Computer Interaction.
- Actively building real-world projects using the MERN stack as part of coursework and self-directed learning.

PROJECTS

Affiliate Marketing Nepal

Aug 2025 – Mar 2026

Technologies: React.js, Node.js, MySQL, Tailwind CSS

- Designed and developed a full-stack affiliate marketing platform targeting the Nepalese e-commerce market.
- Implemented product listings, affiliate link generation and tracking, and an admin dashboard for performance monitoring.
- Applied responsive UI/UX design using Tailwind CSS to ensure consistent cross-device compatibility.

Library Management System

Technologies: MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Built a full-stack library management system covering book inventory, member registration, and borrowing and return records.
- Integrated JWT-based authentication to manage role-based access for administrators and library members.
- Developed an admin dashboard for real-time tracking of library operations and overdue management.

Smart Car Parking System(IOT project)

Technologies: ESP32, C++, IR Sensors, Servo Motor, LCD Display

- Designed and built an IoT-based automated car parking system that detects vehicle presence via infrared sensors and controls entry/exit barriers with servo motors.
- Integrated an LCD display to show real-time parking slot availability, improving user experience and reducing manual oversight.
- Programmed microcontroller logic in C++ using Arduino IDE, managing concurrent sensor input, motor control, and display output.

SKILLS

Technical Skills

- Frontend: React.js, HTML5, CSS3, Tailwind CSS
- Backend: Node.js, Express.js
- Databases: MongoDB, MySQL

- IoT & Embedded: Arduino, C++, Sensor Integration, Servo Control
- Version Control: Git, GitHub
- Tools: Postman, Linux, Canva, Figma, Vs Code
- Data & Scripting: Python, Pandas, NumPy
- Design: UI/UX Design Principles, Wireframing, Prototyping

Soft Skills

- Team Collaboration
- Problem Solving
- Communication
- Team Management

CERTIFICATIONS

MERN Stack Development Certification

Completed

Full-stack web application development covering MongoDB, Express.js, React.js, and Node.js.
